

L'huile des records du monde

75R

Brake fluid - DOT 4

USES

This fluid is particularly designated to the **disk and drum brake systems** and generally adapted to any type of clutch systems. It is suitably adapted to the very severe uses (disk brakes reaching elevated temperatures).

MAIN CHARACTERISTICS

	Units	
Density at 20°C		1,06
PH		6,9
Colour		light yellow
Boiling point (dry)	° C	> 230

PROPERTIES & ADVANTAGES

- High boiling point, avoiding any vapour lock formations into the system when the brakes are used severely
- **Miscible** with DOT 4 et DOT 3
- No seal aggressiveness
- High anticorrosion power facing the most severe requirements

PERFORMANCES

FMVSS 116-DOT4
SAE J 1703
