

L'huile des records du monde

MULTIP EP 2

Extreme pressure & high temperature grease based on Lithium complex soaps

USES

This grease is perfectly adapted to every ball bearings, joints, particularly **under important charges and elevated temperatures.**

Maximum efficiency between **-20°C and +180°C.**

MAIN CHARACTERISTICS

	NLGI 2 grade
Color	beige
Drop point	300°C
Thickener	Lithium complexes
Weld load	> 315 kg

PROPERTIES & ADVANTAGES

- Excellent **extreme pressure** quality
- **Great heat** and leaking **resistance**
- **Secure greasing** and long life for the equipment
- Elevated lubricity due to the high melting point of the thickener
- Water resistance
- Protection against oxidation reinforced

CLASSIFICATION

N.L.G.I. 2
