

L'huile des records du monde

HUILES DE FOURCHE LIGHT & MEDIUM

USES

Oils for **collapsible conventional forks**.
For upside down forks (USD), use our Extra Light or Middle Light forks oils.
The viscosity must be chosen depending on the uses

For competition motorbikes, the fork oil **MEDIUM** is recommended.
The two oils can be mixed together in order to find the right damping.

MAIN CHARACTERISTICS

	Units	LIGHT 5-10 Grade	MEDIUM 15-20 Grade
Density 20° C	kg/m ³	856	872
Kinematic viscosity 40° C	mm ² /s	22	46
Kinematic viscosity 100° C	mm ² /s	5.1	8.2
Viscosity Index		163	159
Pour Point	° C	-39	-39
Flash Point Cleveland Open cup	° C	185	200

PROPERTIES & ADVANTAGES

- Multigrade oils with a high **resistance to shear stresses**
- **Excellent** antirust, antifriction, antiwear and antifoam **powers**
- Shock absorption ensured at all temperatures, all through the year
- **Very good** viscosity stabilisation, maintaining the performances of the fork during a longer time
