

L'huile des records du monde

MIDDLE LIGHT

Upside down fork oil

USES

Tested and used in competition, this synthetic technology oil is especially created for upside down forks (USD) - some kinds of shock absorbers which for a **7.5w or 10w** fluid is required.

Is really convenient for USD forks of road and mountain Motorbikes.

Is particularly effective in SHOWA and WHITE POWER fork types.

MAIN CHARACTERISTICS

	Units	MIDDLE LIGHT Viscosity : 7,5W – 10W
Density 20° C	kg/m ³	863
Appearance, colour		Clear, red
Kinematic viscosity 40° C	mm ² /s	34
Kinematic viscosity 100° C	mm ² /s	8.0
Viscosity Index		207
Pour Point	° C	-51
Flash Point Cleveland open cup	° C	196

PROPERTIES & ADVANTAGES

- **Very high** viscosity index : very little variation of viscosity even with important temperature differences.
- Exceptional resistance to mechanical shearing : the oil consistency is maintained even after **extremely severe** solicitation (competition, rough grounds)
- Allows an **optimal, reliable and lasting** shock absorption whatever the temperature is.
- Reinforced **antifoam and antiwear** powers
- Total protection against wear.
