# MOTOWASH

Biodegradable and foaming cleaner for motorbike

## USES

Aqueous preparation, MOTOWASH is a powerful cleaner mainly due to its homogeneous and very active foam. MOTOWASH can be used to clean the wheel rims, plastics and paints.

## MAIN CHARACTERISTICS

	Values
Aspect	Limpid liquid
Color	Light yellow
p.H. un-diluted	8,5
Density at 20° C	1005
Biodegradability	> 95 %

*The data given in this table are typical values from production and cannot be specifications in any case.*

## PROPERTIES & ADVANTAGES

- Dissolves any dirt (dust, earth, deposits from brake pads, grease)
- Acid, soda and potash free, **MOTOWASH respects the materials**
- Perfect finish aspect when dry
- Two availability for the gun («STREAM»: precise spray and «SPRAY»: wide spray) for a complete cleaning of the motorbike

## DIRECTIONS FOR USE

- Put on «SPRAY» and press far from 20cm
- Let operate during 2mn without letting it dry
- Rinse a **long time** with water or pressure steam
- Dry with a rag afterwards for brilliancy

On very dirty parts :

- Put on «STREAM» and press
- Rub with a sponge or a rag
- Rinse a **long time** with water

## CAUTION USE

- On fragile surfaces : non varnished or painted aluminium, quad bodies and power agriculture equipment, make a test first then rinse quickly and a long time. Do not use on decorations if they are not protected.
- Do not store at negative temperature. MOTOWASH is an aqueous preparation that cannot stand the frost.
- Alkaline product : avoid any contact with the eyes and the skin, use glasses and rubber gloves.
