

L'huile des records du monde

RACING CHAIN

Oil for motorbike chain with high reinforced adherence

USES

RACING CHAIN is particularly adapted for **high speed** uses : competition, highway.
It avoids oil ejection.

PROPERTIES & ADVANTAGES

- High **lubricant** power
- Very good **antiwear and anticorrosion** properties
- Protection of the **toroidal joints**
- Exceptional resistance to **elevated temperatures**
- Specially formulated to offer an **optimal adhesion**
- Long lasting lubrication : extends the chain life
- Excellent **intrusion** : keeps the chain flexibility

OPERATING PROCEDURE

RACING CHAIN dissolves efficiently the old greases and deposits.
However, for a complete cleaning of the chain before lubrication, Yacco recommends the use of our grease remover : **MECAPROP**.
Spray on the **internal face** of the chain for a perfect lubrication.
