ANTIFUITE RADIATEUR

Anti leakage for radiator

USES

Formulated to face leakage troubles in the cooling systems of light duty, heavy duty, off-highway vehicles or industrial or collective equipment.

MAIN CHARACTERISTICS

	Typical Values
Aspect	Liquid
Colour	Colorless
p.H.	11.5
Density	1.06
Flash point Cleveland open cup	Uninflammable

PROPERTIES & ADVANTAGES

- **Allows the clogging of all the leakage** formed in the cooler system, particularly near the radiator bundle, the base or water pump joints, the engine block or at the cylinder head.
- Stops the leakage **in 10 minutes**
- Definitive obstruction
- Resists to the vibrations and to the heat

DIRECTIONS

1. Leave the engine running to reach a good temperature
2. Open the cooler system gently then pour the product into the radiator :
 - One dose for a light duty vehicle
 - Two doses for a heavy duty, off-highway vehicle or a bus.
