# ANTIFUMÉE DIESEL

Fuel additive

## USES

Formulated to treat the Gas Oil for less exhaust smokes and to improve the combustion on **diesel or turbodiesel engines with direct or undirect injection**, for passenger cars and industrial cars.

## MAIN CHARACTERISTICS

	Values
Aspect	Liquid
Colour	Yellow
Density at 20°C	0.895
Open cup Cleveland flash point	> 60°C

## PROPERTIES & ADVANTAGES

- Ashless additive which **improves combustion and implies fuel economy**.
- **Allows the decrease of the exhaust smokes** when measures are taken during a technical checking
- Protects the circuit against rust
- **Cleans the injection system** and extends its life
- Improves the cetane value of 2 or 3 points
- Anti foaming performance in the hydrated and non-hydrated fuel.

## DIRECTIONS

Preventive treatment : 1 dose of 200ml for a 40-60 L fuel tank

Curative treatment : 2 doses of 200 ml for a 40-60 L fuel tank

**For agricultural users (or off-highway materials)**, ANTIFUMEE DIESEL is also very efficient when using *domestic fuel* : 3-4 L for a 1000 L fuel tank
