# ANTIGRIPPANT

Anti-gripping and anti-corrosion paste with copper content

## USES

---

To protect technical pieces especially in **severe conditions** (outside, temperature, ...).

For anti-corrosion and anti-rust uses : **protection of coating** on bolts, cables, chains and for all outside or external equipment exposed to a corrosive atmosphere (industry, Navy).

For high temperature uses : bolts and gaskets (entry pipes, exhaust pipes, cylinder head pipes ...).

## PROPERTIES & ADVANTAGES

---

- The thread of screwed parts or the gaskets submitted to a corrosive atmosphere or to very high temperatures during long periods have no more problems : **very easy to dismantle**, without gripping or metal cut-off
- **Preserves the tightness** on gaskets and pipes

## DIRECTIONS

---

With a brush, apply a film of ANTIGRIPPANT on all parts before assembling.

Can be used **from** : – 20°C to + 1000°C, 1100°C at peak temperature.
