NETTOYANT CARBURATEUR/INJECTEURS

Carburettor and Injector cleaner for gasoline engines

USES

Recommended to face the admission system fouling (carburettor, monopoint and multipoint injection system).

MAIN CHARACTERISTICS

	Values
Aspect	Liquid, fluid
Colour	Light yellow
Density at 20°C	0.772

PROPERTIES & ADVANTAGES

- Removes calamine and varnishes which instigate the clogging
- Maintains the efficiency of the idling
- Adapted to all types of gasoline engines, with or without catalytic converter
- Allows fuel economy, up to 15%
- Decreases the levels of smokes and particles

DIRECTIONS

Preventive treatment

Pour one dose (200ml) in the tank (of 50 L) before loading full fuel. Renew the operation, once every five full fuel load.

Curative treatment

Draw the NETTOYANT CARBURATEUR/INJECTEURS before the idle setting, according to the builder manufacturer.
