

L'huile des records du monde

CARPROPRE

Bodywork cleaner

USES

Developed to clean the bodywork and the tarpaulin of light or heavy-duty vehicles
Can also be used for the cleaning of : floors, boardings ...

MAIN CHARACTERISTICS

	Typical Values
Aspect	Limpid fluid
Color	Blue
p.H. (5% solution)	12.4
Density at 20°C (Kg/m3)	1056
Biodegradability	According to the legislation in force

The data given in this table are typical values from production and cannot be specifications in any case.

PROPERTIES & ADVANTAGES

- **Cleans perfectly** the paints and plastic tarpaulin of light or heavy-duty vehicles
- Removes efficiently the greases from the surfaces such as floors, boardings.
- Eliminates the road grim and the toughest dirt
- Leaves a spot-free finish after an abundant rinsing
- Non-aggressive on most of paints, rubbers, plastic materials or light alloy

DIRECTIONS/DILUTION

- Wash bay gantry : 0.5 to 1 %
- High pressure cleaner :
 - ➔ from 5 to 10% on a non- fragile surface
 - ➔ from 1 to 2% on delicate materials after a previous test (glass, bodywork)
- Manual cleaning of the floor : from 2 to 5% maximum

CAUTION USE

- **Rinse perfectly with water and do not leave the product dry**
- Check the instructions given on the Health and Safety Sheet
 - ➔ Avoid any contact with the eyes or the skin
 - ➔ Use glasses and rubber gloves.
- **Ancient paints (collection cars) and fragile surfaces : do a first test before.**

Do not store at temperatures under -10°C : when it is cold, the product can crystallize but over 0°C , it will recover its normal aspect and efficiency.

Do not use on motorcycles, quads, ... : for these purposes, use YACCO MOTOWASH.
