CONTACT CLEANER

Anti humidity and cleaner product

USES

CONTACT CLEANER is the ideal product for the protection and insulation of electric appliance and parts which are in marine atmosphere (salted mist).

By the way, it is a strong cleaner for the treated parts.

PROPERTIES & ADVANTAGES

Just after the application, CONTACT CLEANER dries very quickly to leave a thin protection.

This film has several properties :

- A strong water repellent effect : evacuates rapidly the spots of water and humidity.
- A protecting molecular aspect : excellent anticorrosion activity (parts of nautical materials, batteries corroded with acid, ...)
- A hard penetration : perfect cleaning of the whole parts.
- A strong cleaning power : can unstuck and drive away the solid impurities.

OPERATING PROCEDURE

- Shake the aerosol
- Spray on the parts to be treated
- Wait for a short time then repeat again if necessary.

For any problem when starting the engine if it is humid CONTACT CLEANER is very effective as a preventive or curative use.
