JANTPROP

Car wheel cleaner

USES

JANTPROP has been formulated for an easy cleaning of car rims. By dissolving the deposits, it restores the brilliance to the look.

MAIN CHARACTERISTICS

	Values
Aspect	Limpid liquid
Colour	Blue
p.H (5% sol.)	12.3
Density at 20°C (Kg/m ³)	1060
Biodegradability	According to the legislation in force

The data given in this table are typical values from production and cannot be specifications in any case.

PROPERTIES & ADVANTAGES

- Detergent and aqueous solution with highly efficient tensioactives
- Removes the dust on pads (disk brake)
- Non-aggressive on paints, elastomer, plastic materials or light alloy
- Restores shine on tarnished rims

DIRECTIONS

1. Spray directly on the rim. Repeat if necessary
2. Let operate during about 3 minutes
3. Thoroughly rinse with water

CAUTION USE

- Do as mentioned on the Health and Safety Sheet :
 - ➔ Avoid any contact with the eyes and the skin
 - ➔ Use glasses and rubber gloves.
- For specific rims : do a test first
- Do not store at temperatures under -10°C : when it is cold, the product can crystallize but over 0°C, it will recover its normal aspect and efficiency.
- **Do not use on motorcycles, quads, ...** : for these purposes, use **YACCO MOTOWASH**.
