

L'huile des records du monde

PROTECPROP

Long life colorless grease

USES

Formulated to protect all mechanisms (**bearings, joints, chains, rolling,**) which can be in contact with food.

Many fields of application : agriculture, motoculture, nautism, automotive.

MAIN CHARACTERISTICS

	Typical Values
Aspect	Grease
Colour	Non colored
Dropping point	250°C
Uses temperature	From -10°C to +150°C

PROPERTIES & ADVANTAGES

- Excellent lubricant qualities
- Good stability with water
- High thermal and mechanical stability
- Good adhesion, **allowing grease economy** and preventing frequent renewals.

DIRECTIONS

Spray onto the mechanical parts
